

Clean Set of Amended Claims

12. (Amended) A notebook computer, comprising:

a display module, wherein the display module comprises,

a display device that displays data, and

drivers mounted in the display module that drive the display device;

a body module, wherein the body module comprises,

a main printed circuit board that processes the data for the display

device, and

a driving circuit mounted on the main printed circuit board that

drives the drivers in the display module; and

a connecting circuit that connects the drivers and a back light unit with the

driving circuit, wherein said connecting circuit comprises,

a flexible printed circuit film that connects between the drivers and

the driving circuit, and

a conductive line that connects between the driving circuit and the

back light unit.

13. (Amended) The notebook computer of claim 12, wherein the display module further comprises the back light unit that irradiates the display device, and

wherein the driving circuit is a module control board mounted on the main printed circuit board, and wherein the module control board drives the back light unit.

14. (Amended) The notebook computer of claim 13, wherein the conductive line connects the back light unit with the module control board.
